

Web of Science datubāzes.

Iespējas informācijas meklēšanā un izgūšanā.

The screenshot displays the Web of Science search interface. At the top, the Clarivate logo and navigation links (Search, Marked List, History, Alerts) are visible. The main header area is purple with the text "Discover multidisciplinary content from the world's most trusted global citation database." Below this, there are tabs for "DOCUMENTS" and "RESEARCHERS". The "DOCUMENTS" tab is active, showing a search bar with the text "Search in: All Databases" and "Collections: All". A dropdown menu is open, showing a list of search criteria: "Topic", "Title", "Author", "Publication/Source Titles", "Year Published", "Publication Date", and "Abstract". The "Title" option is selected. A search box contains the text "Example: oil spill* mediterranean business*". A "Search" button is visible at the bottom right of the search area.

Mg. bibl. inf. Elita Bērziņa

Clarivate Analytics (bij. ISI Thomson Reuters) Web of Science

- satur daudzpusīgu zinātnisku informāciju eksaktajās zinātnēs, sabiedriskajās zinātnēs un humanitārajās zinātnēs;
- aptver vairāk kā 20000 žurnālu, 51 milj. patentu, 15000 konferenču rakstu, 5500 tīmekļa vietņu u.c.
- satur informāciju 250 zinātņu nozarēs;
- piedāvā „analīzes rīkus”, kas nosaka autorus, kuri par attiecīgo tematu rakstījuši visvairāk, atrod institūcijas, kuras publicē rakstus kādā noteiktā jomā, sniedz ieskatu publikāciju tendencēs, nosaka ievērojamākos sadarbības partnerus zinātniskajos projektos;
- piedāvā mijnorādes (saites) uz pilniem tekstiem ~10000 žurnālos.
- Journal Citation Reports® (JCR) - piedāvā objektīvu līdzekli, lai kritiski novērtētu pasaules vadošos žurnālus, pamatojoties uz citēšanas datiem. Ir pieejami žurnāla nozīmīguma rādītāji (Impact Factor, Eigenfactor) un cita informācija.
- EndNote® - tiešsaistes atsauču organizēšanas rīks, kurš palīdz organizēt pētniecības rezultātus, apkopot un organizēt atsauces, izveidot noteikta formāta bibliogrāfijas.

Abstract
In recent years, more and more scientists and society have been discussing the competitiveness of work remuneration and social security, which has a significant impact on the well-being of local people. Every country has a social security system that largely depends on the social and economic situation as well as on the social policy implemented in the country. The research hypothesis: it is possible to identify and group factors impacting work remuneration in social protection. The research aim is to study the factors impacting work remuneration in the context of social protection in Latvia. The research results confirm that the factors influencing the level of wages may be divided into macroeconomic, microeconomic and personal individual factors. Low work remuneration indicates on lower welfare and social protection of the population. The research includes a population survey carried out in Latgale region, since the average monthly gross salary is lower in this region compared with the other statistical regions of Latvia. The population survey data show that the most important personal individual factors influencing work remuneration are the position held and the level of education. The workplace in an international or local company as well as the length of service are other important factors. The lowest average rating of the population is given to other factors possibly impacting the level of work remuneration such as age, gender, health and marital status.

Keywords
Author Keywords: work remuneration; social protection; impacting factors

Abstract
This study uses the stakeholder perspective to knowledge spillover theory at university to explain how various characteristics of internal and external university stakeholders will affect its entrepreneurial outcomes. Acknowledging the heterogeneity between entrepreneurial universities, we theoretically developed and empirically tested a model for four types of stakeholders (knowledge enablers, knowledge creators, knowledge codifiers, knowledge facilitators) across three university types (Russel group, teaching-based and polytechnic universities). To test our hypothesis related to the role of stakeholders in entrepreneurial outcomes of a university we used panel data on 139 UK universities that achieved entrepreneurial outcomes during 2010 and 2016. The results demonstrate significant differences in the role that stakeholders play in knowledge spillover entrepreneurship at universities with the effects vary across three distinct university types.

☒ 2 An integrated interval-valued intuitionistic fuzzy AHP-TOPSIS methodology to determine the safest route for cash in transit operations: a real case in Istanbul
Yildiz, A; Guner, AE; (...) ; Taskin, A
Apr 2022 (Early Access) | [NEURAL COMPUTING & APPLICATIONS](#)
The Cash in Transit (CIT) deals with the money distribution and picking up between depot(s), central bank, bank branches, Automated Teller Machines (ATMs), jewelry stores, and exchange offices, safely and quickly. It is critical for companies carrying out CIT activities to identify risks and their priorities. It is one of the problems to be resol ... [Show more](#)

☐ 3 The role of institutions in the early entrepreneurial process
Bjornskov, C; Foss, NJ and Xu, TJ
Apr 2022 (Early Access) | [INDUSTRIAL AND CORPORATE CHANGE](#)
Much entrepreneurship research has focused on explaining why some countries and regions have more entrepreneurial activity than others, and the role played in this regard by cross-national and cross-regional differences in institutions. However, this stream has not considered entrepreneurship from a process perspective that is, as i ... [Show more](#)

Journal's performance

Journal Impact Factor

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)
