<http://www.scopus.com/>

The screenshot displays the Scopus search interface. At the top, the Scopus logo and navigation links (Scopus, SciVal, LLU macibsp. un petn. publikac) are visible. The main navigation bar includes 'Search', 'Alerts', and 'Lists'. A banner for a webinar is present. The search section is titled 'Document search' and includes 'Author search' (highlighted with a red box), 'Affiliation search', and 'Advanced search'. The search criteria are: 'lapi\*' in the author last name field, 'D' in the author first name field, and 'Latvia university of agriculture' in the affiliation field. A search button (magnifying glass icon, also highlighted with a red box) is located to the right of the first name field. Below the search criteria, there is a section for 'Limit to:' with various filters. On the right side, there is a text box explaining the Scopus Author Identifier algorithm. The search results section shows '1 of 2 author results' and lists the author 'Lapiņš, Dainis' with 1 document. The document details include '7 Agricultural and Biological Sciences ; Latvia University of Agriculture Jelgava Latvia' and 'Engineering ; Energy, ...'. The left sidebar contains various filters such as 'Source Title', 'Affiliation', 'City', 'Country/Territory', and 'Subject Area'. The bottom right corner shows 'Page 1' navigation.

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)
